

HY-LINE SALES LTD

Place the Flood Buzz in any potential flood spot - such as next to washing machines, sinks, water heaters, bathrooms, basements, boats, sump pumps, garages, inside sink cabinets, etc. - and the Flood Buzz will let you know if and when you have a leak.

No buttons to push...
No complicated programming... No batteries to insert... Just place it and forget it!

Flood Buzz Pro

**Warns you of a water leak
before it turns into a flood...**

Follow These Easy Directions:

1. Carefully remove the Flood Buzz from the packaging handling the product from the top.
2. Place the Flood Buzz in any potential water leak areas in your home.

When the Flood Buzz detects even a small water leak, the alarm lets you know that you have a potential flood - before it becomes a real problem. For best protection, we recommend replacing your Flood Buzz every 3 years and after a unit is triggered.
